

SCHOOL-BASED

ORAL HEALTH PROGRAM

HEALTHY SMILES, HEALTHY MINDS

Kids with dental problems can have a hard time focusing in school. The DC Department of Health School-Based Oral Health Program brings dentists to schools to provide dental check-ups and services that help prevent cavities and connect students to dentists in their communities.

Sign up for the School-Based Oral Health Program today to keep your child's smile healthy and minds clear for learning!

Visit your school's health suite for more information or visit dchealth.dc.gov.
